

Task Description:

Title: Build a Personal Portfolio Web Page

Requirements:

1. Page Structure:

- Use appropriate **semantic tags** for better structure.
- Include sections such as:
 - **Header:** Your name/logo and a navigation bar.
 - **About Me:** A brief introduction about yourself.
 - **Skills:** A list of technical or personal skills.
 - **Projects:** Showcase at least 2-3 projects with a brief description and links to live demos or GitHub repositories.
 - **Contact:** A form with fields for the visitor to input their name, email, and message.

2. Styling (Optional): if you guys interested to style your web page you can do it

- Use inline **style** attributes or an external CSS file for styling.
- Ensure the layout is visually appealing.
- Add hover effects for buttons or links.

3. Images:

- Include a profile picture or logo.
- Add relevant project thumbnails.

4. Links:

- Add clickable links for:
 - Social media profiles (e.g., LinkedIn, GitHub, Twitter).
 - Contact email.
 - Live project demos or repositories.

5. Optional Enhancements (Bonus):

- Use a simple **<iframe>** to embed your LinkedIn or GitHub profile.
 - Add a section for hobbies or testimonials.
 - Use an ordered or unordered list to display skills.
-
